Hobbies

Cycling, Swimming, Home Improvement, Audio Books

Profile

I am a software professional that collaborates with business experts to understand what market value we can create. Then I drive the creation of that value by planning, designing, developing, and delivering high-quality software. Understanding software development principles and best practices enables me to optimize the delivery process. I excel in providing technical leadership and mentorship to teams of software engineers.

My expertise spans a range of technologies, including back-end development, cloud computing, data storage, and front-end development. I specialize in technologies that drive programmer productivity, reduce development time, and maximize ROI.

Employment History

Senior Software Engineer, Salesloft, Remote

JANUARY 2022 — PRESENT

Tech Lead for the delivery team. Increased enterprise retention by leading the architecture & technical planning for JWT auth and user management features.

Software Engineer, Salesloft, Remote

JANUARY 2020 — JANUARY 2022

Delighted our larger customers with the planning & development of features related to user login, user management, user groups, access control, and search.

Internal Software Engineer, Salesloft, Remote

JULY 2017 — JANUARY 2020

Enabled Salesloft to scale by leading the technical planning & execution of an internal customer management application.

Support Engineer, GitLab, Remote

AUGUST 2016 — JUNE 2017

Helped customers, including Fortune 100 clients, reach their code repository goals by enabling them to run GitLab on their infrastructure.

Founder & Director, Together Technologies, South Africa

OCTOBER 2012 — AUGUST 2016

Started & led a coding boot camp for young people from disadvantaged backgrounds. Successfully trained & mentored students from scratch to start careers in software engineering.

IT Service Lead, YWAM Muizenberg, South Africa

JANUARY 2008 — DECEMBER 2014

Oversaw & implemented IT infrastructure for a campus with 200+ daily users. Managing & training several people including my replacement.
