Profile

I am a software professional who collaborates with business leaders to deliver products users love. I create value by planning, designing, developing, and delivering high-quality software. Understanding development best practices enables me to optimize the delivery process. I uniquely provide technical leadership and intentional mentorship to teams of software engineers.

My expertise spans back-end development, cloud computing, data storage, and front-end. I specialize in technologies that increase programmer productivity, reduce development time, and maximize ROI.

Employment History

Senior Software Engineer, Salesloft, Remote

JULY 2017 — PRESENT

- Received two promotions, and remained through two rounds of layoffs.
- As Tech Lead for the delivery team. Increased enterprise retention by leading the architecture & technical planning for JWT auth and user management features.
- Delighted our larger customers with the planning & development of features related to user login, user management, user groups, access control, and search.
- Led planning and execution of internal customer management system. This new portal delighted the security team by enforcing SSO, and the legal team with audit logging, and saved our Customer Success team countless hours in ticket management.

Support Engineer, GitLab, Remote

AUGUST 2016 — JULY 2017

- Onboard and retain customers, including Fortune 100 clients, by enabling them to run GitLab on their infrastructure.
- Joined the sales team on high-profile sales calls to communicate technical value and answer operation & integration questions.
- Helped customers succeed by delivering corporate Git training.

Founder & Director, Together Technologies, South Africa

OCTOBER 2012 — AUGUST 2016

Started & led a coding boot camp for young people from disadvantaged backgrounds. Successfully trained & mentored students from scratch to start careers in software engineering.

IT Service Lead, YWAM Muizenberg, South Africa

JANUARY 2008 — DECEMBER 2014

Oversaw & implemented IT infrastructure for a campus with 200+ daily users. Managing & training several people including my replacement.
